

Caring for your Wooden Spoons

Congratulations on your new handcrafted wooden utensil from *Wanna Spoon*? Caring for your wooden spoons is as simple as 1-2-3 and you will be rewarded with a spoon whose beauty only grows with time.

1. You can hand wash your spoon in mild detergent right along with your other dishes. Avoid the dishwasher, as the high heat can cause the wood to dry out and eventually crack.
2. A very fine-grained sandpaper will take care of stains or surface blemishes.
3. Every few months or so, rubbing the spoon with mineral oil will replenish any lost moisture in the wood and bring out the natural grain and shine. Don't use food oil as it will eventually spoil.

...That's it!

Happy Spooning from *Wanna Spoon*?
